

To,

The Dean (SW-1&2)

NIT Agartala

Subject : Seeking apology for misconduct on part of E-Cell, NITA with regards to the Coursera Program.

Respected Sir,

I, Ritam Kar, student of 5<sup>th</sup> Semester, Production Engineering Department, am a member of the Core Team of E-Cell, NITA.

With the view of imparting knowledge and skill to the students of our esteemed institution, we partnered with Coursera.org to provide all courses, from prestigious universities and companies around the world, with certificates to students of our college, absolutely free of cost. This enabled multitude of students (including myself) to take courses that they wouldn't in normal circumstances because of the high costs.

In the process of starting this program, we did a mistake and did not obtain any written permission for the program and I, along with the entire E-Cell team sincerely apologise for the same. It was never our intention to cause any problems, but to only provide a platform of learning and growth to the students of our institution, so as to better utilise the lockdown period and bring laurels to our institution in the future. We are grieved by our mistake, and promise to never repeat such a mistake ever again, and carefully follow all rules and procedure in the future.

I would be highly obliged, if you accept our apologies.

Thanking you.

Yours Sincerely,

Ritam Kar
